DETAILED ACTION

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: the prior art reference has failed to disclose or suggest a device for skin dermabrasion comprising a handleable housing and abrasive driving means, an arcuate abrasive surface that extends along an arc of a cylindrical surface with the abrasive surface on the curved outside of the arc, the arcuate abrasive surface being held by a support in or on the housing for an oscillatory motion caused by said driving means allowing oscillation of the arcuate abrasive surface about **the axis of said cylindrical surface (or axis of oscillation of the arcuate surface)**, and a support surface surrounding the oscillatory arcuate abrasive surface at least on two opposing sides, said axis of oscillation of the arcuate surface being parallel to said two opposing sides of the support surface, said two opposing sides leaving a gap to allow oscillating motion of the arcuate abrasive surface in said gap with the arcuate abrasive surface oscillable across the gap between said two sides, the device being arranged in such a way as to allow the support surface against the skin and around the region of the skin to be treated, the gentle contact of this region of the skin with the oscillating arcuate abrasive surface as recited the claims.

Claims 1-13, 15-20 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
